BSI Newsletter – New Email Transport in POS Store & Forward

The new POS Store & Forward 3.06, features:

- Automated, e-mail transfer of Point of Sale information between locations. Sender and receiver require no operator intervention or installation of client e-mail software. All data are encrypted and compressed in transit.
- Completion of interface with TEC 2700/3600/3700 registers. These are used primarily for hospitality. All POS reporting available at PC, stores and home office or owner's, manager's laptops.
- E-mail transport of Datasym Daily Z or end of day files.
- Register "cloning" for easy setup.

Why does e-mail information transfer represent a significant advance?

- Millions of individuals and corporate employees send and receive vital communications over e-mail every day. Because of this great usage, e-mail transfer is available at in-expensive prices (Economy of Scale) to small to medium businesses through high-quality ISPs or in-house services.
- It is also very easy to use and set-up. Destinations (endpoints) are simply entered as e-mail addresses.
- The nature of e-mail servers, (high-speed sockets servers), provide highly capable transport mechanisms.
- The e-mail server itself serves as holding area for information that protects against data loss at destination locations, if errors or outages occur.

See our website at <http://www.cooken.com/POSStoreAndForward.htm> or contact us at info@barringtonsoftware.com or (888) 394-0047 for more information about POS Store And Forward.

Did You Know?

Both Barrington Software Back Office systems, CookenPro and BSI Inventory Control, can import an electronic invoice or bar code scan and create the Purchase Order and Invoice with a click. Both of these can be sent to QuickBooks along with a Vendor Payable. If you order by phone and receive by bar code scanner or vendor's electronic invoice, one of these products is for you.

You are receiving this newsletter either because you are a customer, you have requested information, or you have downloaded software and given us your e-mail address. If for any reason, at any time you no longer wish to receive a newsletter from us, just enter "remove" anyplace in a reply to our e-mail.
